

Special Issue ISSRE 2015  
Open Call for Papers

**Journal of Systems and Software**

Following the *26th Annual International Symposium on Software Reliability Engineering (ISSRE 2015)*, we invite submissions for extended papers on innovative techniques and tools for assessing, predicting, and improving the reliability, safety, and security of software products.

Topics of interest include, but are not limited to:

- Reliability, availability, and safety of software systems
- Verification and validation
- Software quality
- Software security
- Dependability, fault tolerance, survivability, and resilience of software systems
- Systems (hardware + software) reliability engineering
- Services reliability engineering (cloud services, problem reporting services, etc.)
- Engineering reliable adaptive, self-aware and self-\* systems
- Metrics and measurements, estimation, prediction of quality/reliability
- Supporting tools and automation
- Software at large scales and software on small devices.

Papers must be written in English and formatted according to the journal guidelines (<http://ees.elsevier.com/jss>) for LaTeX (<http://www.elsevier.com/latex>).

Papers must be submitted to <http://ees.elsevier.com/jss/> no later than Feb. 28<sup>th</sup>, 2016.

**Important dates:**

- Feb. 28, 2016: deadline for manuscript submission
- April 30, 2016: first round decision announcement
- June 15, 2016: revised submissions due
- July 31, 2016: second round decision announcement
- Sept. 30, 2016: camera-ready version due

**Guest Editors:**

Marco Vieira, University of Coimbra, Portugal  
Katinka Wolter, Freie Universität Berlin, Germany.
